Earth Alive MC-1 powder

Mosquito Larvae Control

GENERAL PRODUCT INFORMATION

The Earth Alive Mosquito Larvae Control is a 100% natural and biodegradable microbial formula, specially formulated for the treatment and elimination of mosquito larvae, blackflies, nuisance flies and nuisance aquatic midges present in a variety of habitats. The product is safe for humans and the environment.

The Earth Alive Mosquito Larvae Control is proven effective in the elimination of the "Aedes aegypti" mosquito (the yellow fever mosquito) responsible for the transmission of the **dengue** and **chikungunya** fevers, and other diseases. It is also effective against the "Culex pipiens" (common house mosquito) that play key roles in the transmission of a range of diseases such as Japanese encephalitis, meningitis, and urticaria.

The product contains Bacillus thuringiensis microorganisms combined with other ingredients that provide insecticidal properties affecting a selective range of insect orders. These live microorganisms are able to stop the growth of mosquitoes, blackfly larvae, and other nuisance flies.

Product Composition	
Bacillus thuringiensis (Subspecies Israelensis)	17.14%
Other ingredients	82.86%
Total	100.00%

Typical Use

The Earth Alive Mosquito Larvae Control is safe for use in aquatic environments, stagnant waters (e.g. marshes, ponds, rain water basins, paddy fields), retained waters (e.g. lakes, irrigation ponds, dams), and humidity zones (e.g. flood zones, parks), for the control of mosquito, blackfly as well as fungus gnats (small, dark, & short-lived flies that commonly develop in the growing medium of houseplants), and nuisance insect larvae.

Benefits				
100% natural and biodegradable microbial formula	Replaces harmful chemicals	Non-toxic to humans and the environment	Offers residual control	Dissolves easily in water
