

EA1 AGROSAFE

SUSTAINABLE DUST CONTROL

THE MOST SUSTAINABLE, SAFE
AND EFFICIENT DUST CONTROL PROGRAM
FOR RURAL AND FARM ROADS.

earthalive™
NATURE'S FORCE

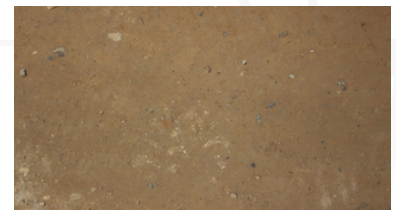

THE ONLY SOLUTION THAT INTEGRATES MICROBIAL TECHNOLOGY TO CONTROL DUST EMISSIONS.

Controlling dust emissions on rural and farm roads has become a major issue due to the adverse impacts of dust on the growth and productivity of crops, and its impact on neighbouring communities and workers' health.

EA1 AgroSafe contains a naturally-derived microbial formulation and plant-based ingredients. Once in the soil, the microorganisms bind dust particles together, creating a firm and resistant surface layer that will not generate dust. This protects agricultural fields from the negative impacts of dust, favoring crop productivity.

BEFORE

AFTER

EA1 AGROSAFE CAN BE USED FOR DUST CONTROL IN ANY TYPE OF AGRICULTURAL OPERATION, EITHER ORGANIC OR CONVENTIONAL. APPLY EA1 AGROSAFE ON:

FARM ROADS

RURAL ROADS

ACCESS ROADS

EA1 AGROSAFE IS THE MOST EFFICIENT AND MOST NATURAL DUST CONTROL PRODUCT ON THE MARKET.

COMPLIANT TO MANY INTERNATIONAL CERTIFICATIONS, EA1 AGROSAFE IS A SAFE PRODUCT FOR THE AGRICULTURE INDUSTRY.

CONSULT OUR EXPERTS IN DUST CONTROL FOR ADDITIONAL INFORMATION ON EA1 AGROSAFE DUST CONTROL TECHNOLOGY.
