

INTERLUBE IL-EA1-AP

BIODEGRADABLE DUST SUPPRESSOR

IL-EA1-AP

DESCRIPTION :

Interlube (IL-EA1-AP) is our dust control solution specially designed for mining and industrial roads, based on the use of a 100% organic product, IL-EA1-AP, for effective, long-lasting, and environmentally sustainable reduction of dust emissions.

Earth Alive has developed the world's only biologically-based and biodegradable dust suppressant, named EA1. It is the most effective dust control alternative, capable of eliminating 90% of dust on job sites. EA1 is used to combat dust generation on unpaved roads, crushers, among others.

It has an easy application process that does not require specialized equipment. Traffic can resume immediately after application. It is safe for the environment and nearby water sources, and provides better stability and traction for roads.

LONG TERM EFFECTS

REDUCTION OF DUST PARTICLES

REDUCTION OF WATER USED

ECOLOGICALLY SUSTAINABLE

OPERATIONAL COSTS REDUCED

REDUCTION OF THE FLEET

REDUCTION OF OPERATING EXPENSES

REDUCTION OF MAINTENANCE

Approved by the Quebec Standardization Bureau, BNQ 2410-300/2009-10-01 certificate 4083

APPLICATIONS AND INDUSTRIES: Tote 1040L and Bulk.
